SKILLS

Languages: Python, Java, JavaScript, SQL
Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Backend Development: Node.js, Express.js, REST APIs, Authentication & Authorization, API Integration
Databases: MySQL, PostgreSQL, MongoDB, MongoDB Atlas
Full Stack Development: MERN Stack, CRUD Applications, Client-Server Architecture, State Management
Tools & Platforms: Git, GitHub, Postman, Docker, Jenkins, Kubernetes, VS Code
Frameworks & Libraries: React Router, Axios, FastAPI, OpenCV, Scikit-learn, Hugging Face

LANGUAGES

- English (Fluent)
- Marathi (Fluent)
- Hindi (Fluent)
- German (Beginner)

ACHIEVEMENTS

- Winner BlueBit 4.0 National Level Hackathon (2026)
- IEEE Pune Section Co-SSR (2026)
- PCCoE IEEE SB Vice Chair (2025-26)
- Most Promising Student Award (2023)

PROFILE

B.Tech IT student specializing in AI systems, LLM-based agents, and applied machine learning. Experienced in building multi-step reasoning systems, computer vision models, and blockchain-backed applications, with deployments using FastAPI, Docker, and Hugging Face Spaces. Passionate about developing research-driven, real-world AI solutions at scale.

PROJECTS

NexusTruth - Fake News Verification Environment 2026

AI/ML Engineer

- Built a multi-agent LLM system for claim verification using search + reasoning pipelines
- Designed a custom evaluation framework scoring factual accuracy, reasoning quality, and evidence grounding
- Implemented tool-augmented agents with retrieval and multi-step decision making
- Deployed using FastAPI and Docker on Hugging Face Spaces for
- Improved verification reliability through structured reasoning workflows

Wildfire Detection System using Image Processing 2025

Computer Vision Engineer

- Trained a CNN-based model (ResNet/custom) on satellite imagery dataset for wildfire detection
- Applied image preprocessing (OpenCV) including noise reduction and feature extraction
- Achieved 97% validation accuracy, outperforming baseline models
- Built real-time inference API using Flask

Goal Setting & Tracking Portal 2026

Full Stack Developer

- Built responsive frontend dashboards using React.js for employees, managers, and admins.
- Developed REST APIs with Node.js and Express.js for goal tracking and approval workflows.
- Integrated authentication and database management for secure user and progress tracking.

EXPERIENCE

Blockchain Developer Intern JUNE 2025 - JULY 2025

BlockseBlock

- Built responsive frontend interfaces using React.js.
- Integrated frontend with backend APIs.
- Improved UI performance and user experience.

EDUCATION

B.Tech in Information Technology 2023-2027

Pimpri Chinchwad College of Engineering (PCCoE)
